Industry: Arts, Culture & Entertainment

ARTS, CULTURE & ENTERTAINMENT

67.5 Avg Reputation

Based on 1884 businesses audited.

REPUTATION LEVEL

HIGHER REPUTATION THAN AVERAGE

DELICIA has 11.5 points more reputation than the average for Arts, Culture & Entertainment.

EXPERT VERDICT

This site is a rare example of substance over signal. It replaces standard marketing fluff with a technical datasheet, proving its 100-year heritage through mechanical specificity rather than grandiose adjectives.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

25

83% Reputation

Information density is remarkably high, driven by technical specifications rather than marketing prose. Product pages like the Delicia JUNIOR 72 and Carmen 96 provide granular data including reed types (SPECIAL, A MANO), weight in kilograms, and exact dimensions in millimeters. Only the Homepage H1 contains minor fluff with the phrase 's tradicí' (with tradition), but this is immediately anchored by the specific noun '?eská ru?ní výroba' (Czech handmade production).

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

18

90% Reputation

The semantic drift is near zero. The homepage promise of 'handmade accordions and heligonkas with tradition' is directly supported by sub-pages showcasing models named after Josef Hlavá?ek (a historical maker) and offering custom orders ('na objednávku'). There is no disconnect between the 'premium' positioning and the provided technical depth and pricing (e.g., 108,990 K? for the Hlavá?ek 1938 MOSAZ).

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

13

65% Reputation

DIAGNOSIS: TRUST THEATRE

The site avoids trust theatre by maintaining conservative review counts (13 on the homepage, 5 on product pages) and providing proof_links_count of 3. However, there is a slight gap in external verification paths for the '100 let' (100 years) claim, which is presented as a statement of fact without a dedicated history section or external archival link. The lack of a trust_theatre_flag suggests the reviews are not being algorithmically inflated.

EVIDENCE: PROOF DENSITY

The proof density is high due to the 'Detailní popis produktu' section on every sub-page. Every instrument is defined by at least 10 unique data points (weight, range, registers, etc.). This ratio of hard data to marketing assertions is approximately 4:1, which is significantly better than the industry average for luxury craftsmanship sites.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

12

80% Reputation

The site does not use the generic jargon found in the provided industry patterns for arts venues, such as 'immersive experience' or 'cultural vibrancy.' Instead, it uses industry-specific technical terms like 'třívlas' (three-voice) and 'heligonové basy' (heligon basses). The value proposition is highly unique to the craft of accordion making and would be difficult to copy-paste onto a generic competitor without changing 90% of the technical data.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

11

73% Reputation

DIAGNOSIS: AUTHORITY GAPS

Authority is primarily established through the brand's heritage and technical specs. While the schema_json is a basic Organization type, it correctly identifies contact points and social signals (Instagram). A minor gap exists in the lack of Person schema for current master craftsmen or historical figures mentioned, such as Josef Hlaváček, leaving the 'expert' status tied to the brand rather than individuals.

EVIDENCE: PERFORMANCE VS. CLAIMS

Performance claims are mechanical rather than experiential. Instead of claiming 'unforgettable sound,' the site claims 'four voices in the left hand' and 'A MANO DURAL quality.' These are verifiable physical attributes of the instruments. The disconnect is minimal, as the product descriptions focus on the physical capabilities of the tool rather than the vague outcome for the player.

INDUSTRY MATCH & SCORE SUMMARY

Arts, Culture & Entertainment Reputation: DELICIA (delicia.cz)

Reputation: 79 / 100

INDUSTRY CLASSIFICATION

While classified under Arts, Culture & Entertainment, the site content identifies as a high-precision manufacturing entity. It serves the industry by producing instruments, shifting the focus from 'audience

engagement' to technical engineering and craftsmanship.

"The score of 79 is driven primarily by the high 'Trust and Proof' pillar, specifically the lack of external verification for historical claims, and minor 'Identity and Authority' gaps in structured data. The technical content itself is nearly devoid of bullshit."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
