BRAND AI REPUTATION

Crypto, Blockchain & Web3 Reputation: Whale Alert (whale-alert.io)

<https://whale-alert.io>

Industry: Crypto, Blockchain & Web3

CRYPTO, BLOCKCHAIN & WEB3

54.3 Avg Reputation

Based on 366 businesses audited.

REPUTATION LEVEL

HIGHER REPUTATION THAN AVERAGE

Whale Alert has 8.7 points more reputation than the average for Crypto, Blockchain & Web3.

EXPERT VERDICT

Whale Alert is a high-substance utility operating inside a zero-substance corporate identity. The platform offers genuine on-chain metrics and a clear value proposition but functions as a total institutional ghost with amateur technical maintenance.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

22

73% Reputation

The site exhibits high information density in its metric definitions, which is rare for the crypto industry. For example, the body text provides a specific methodology for the Average Buy Profit (ABP) ratio, explaining it as the sell price divided by an addresses' average buy price. While it uses some power words like 'essential' and 'high-value,' the majority of H2-H6 headings are descriptive labels for data points (e.g., Transactions, HODL Days, Potential Profit) rather than marketing fluff. However, the Alerts and News sub-pages are relatively thin, serving mainly as containers for pricing information.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

18

90% Reputation

There is minimal semantic drift between the homepage promise and the sub-page content. The homepage H1/Hero section promises a tool for crypto transactions and live analytics, and the sub-pages for Alerts and News directly support these specific functions. The messaging is consistent across the site, focusing on amateur and professional traders. The only significant drift is the technical failure of the Bitcoin realized profit analytics page, which leads to a 404 error, contradicting the promise of 'full dashboard access.'

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

13

65% Reputation

DIAGNOSIS: TRUST THEATRE

Whale Alert avoids trust theatre by not including fake review widgets or unverified testimonials (review_count is 0 across all pages). However, it falls into the trap of 'claims without evidence' by using phrases like 'Trusted By' and 'Partnered With' in the clean_text without providing verifiable names, links, or logos in the structured data. This creates a vacuum of social proof where the user is expected to trust the tool's 'essential' nature without third-party validation.

EVIDENCE: PROOF DENSITY

The ratio of verifiable technical definitions to vague assertions is high. The site explains exactly what HODL Days and Realized Profit measure, which provides internal proof of technical competence. However, external proof is non-existent; there are zero proof_links_count to external audits, media mentions, or third-party verified reviews, leaving the technical claims isolated from reality.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

9

60% Reputation

The value proposition is more specialized than a typical 'future of finance' crypto site because it focuses on the specific niche of large-scale transaction tracking. Despite this, it uses boilerplate template fingerprints for its pricing tiers and 'Contact Us' sections. The pricing structure (\$14.95 to \$29.95/month) and the 7-day free trial offer are standard SaaS commodity models that lack a unique or disruptive engagement hook.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

1

7% Reputation

DIAGNOSIS: AUTHORITY GAPS

The site suffers from a total lack of identifiable authority; no named founders, team members, or company registration details are present. There is no schema_json (Organization or Person schema), which creates a significant credibility gap for a financial analytics platform. The technical implementation is further marred by empty meta descriptions and a 404 error on a primary analytics link, suggesting a lack of institutional oversight.

EVIDENCE: PERFORMANCE VS. CLAIMS

The site makes a bold performance claim that it is the 'only tool you need' to stay up to date, which is subjective and unsubstantiated. There are no case studies or data points demonstrating how the tool has 'improved trades' for its users. However, the site avoids the more egregious industry red flags like 'guaranteed returns' or FOMO language, sticking instead to utility-based claims.

INDUSTRY MATCH & SCORE SUMMARY

Crypto, Blockchain & Web3 Reputation: Whale Alert (whale-alert.io)

Reputation: 63 / 100

INDUSTRY CLASSIFICATION

The site is a quintessential blockchain data utility. Its terminology?Realized Profit, HODL Days, and Whale Alerts?aligns perfectly with the Crypto and Web3 data analytics sector, providing specific tools for on-chain transaction monitoring.

"The score is driven primarily by the Identity and Authority pillar (14/15) due to total anonymity and technical gaps. The Information Density (8/30) and Semantic Coherence (2/20) pillars remained low-BS because the site provides actual mathematical definitions for its metrics and maintains a consistent, utility-first message."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
