REPUTATION LEVEL

#### HIGHER REPUTATION THAN AVERAGE

SheVibe has 18.4 points more reputation than the average for Ecommerce & Online Retail.

## EXPERT VERDICT

SheVibe is a high-substance retail entity with a remarkably low bullshit score. It provides the technical and logistical transparency required for its niche, moving beyond generic ecommerce templates through physical presence and extreme clarity on privacy and billing.

### INFO DENSITY

Power-words vs. Substance ratio.

26

87% Reputation

Information density is exceptionally high for a retail site. Heading markers H3 are almost exclusively utilized for specific product names such as LELO LIV 3 App-Controlled Silicone G-Spot Vibrator and Njoy Pure Wand Double Ended Stainless Steel Dildo rather than vague marketing fluff. Body substance is maintained through technical product details and specific pricing, though minor fluff exists in H2s like Knowledgeable Staff and World Class Support without immediate qualifying data in the same section.

### SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

18

90% Reputation

There is virtually zero semantic drift between the homepage signal and sub-page substance. The homepage H1 and meta description promise a pleasure boutique with 100% discreet shipping, and the sub-pages deliver granular evidence of this, specifically the Contact Us page which detail exactly how charges appear on billing statements (e.g., SP SV INC) to fulfill the discretion promise. The Help page supports the Boutique identity with mentions of a Toy Buyers Guide and Educational Guides.

## TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

17

85% Reputation

### DIAGNOSIS: TRUST THEATRE

The site avoids trust theatre by backing its 434 reviews with 6 proof links and a verifiable physical identity. Unlike sites that hide behind anonymity, SheVibe provides a specific physical address at 72 Maple St, Beacon NY 12508 and a toll-free phone number. The review count is high and consistent across the product-heavy homepage.

### EVIDENCE: PROOF DENSITY

The proof density is high, anchored by the 2006 establishment date and physical location. Verifiable evidence (product SKU specifics, exact store hours, physical address, social media links) significantly outweighs vague assertions. The ratio of product-specific nouns to marketing power words is approximately 8:1 in the heading structure.

## COMMODITY FINGERPRINT

Detection of industry cliches/templates.

9

60% Reputation

The site does exhibit a moderate commodity fingerprint typical of Shopify-based retail. Phrases such as Best Sellers, New Arrivals, and curated with care from the pattern dictionary are present. The loyalty program Power Up Points is a standard industry mechanic, though the site adds substance by explicitly prohibiting drop shipping and point abuse in the H4 text.

## IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

12

80% Reputation

### DIAGNOSIS: AUTHORITY GAPS

The primary authority gap is the claim of Knowledgeable Staff and World Class Support without naming specific sexual health experts or providing staff credentials. While the brand has existed since 2006, which provides historical authority, the experts mentioned lack Person schema or sameAs links to external professional profiles.

### EVIDENCE: PERFORMANCE VS. CLAIMS

There is a minor disconnect regarding the claim of being industry leading in support, as no third-party awards or specific response-time metrics are provided to quantify this. However, the operational transparency regarding customer care hours and the itemized billing explanation on the Contact Us page significantly bridges the gap between marketing tone and actual service demonstration.

## INDUSTRY MATCH & SCORE SUMMARY

Ecommerce & Online Retail Reputation: SheVibe (shevibe.com)

Reputation: 82 / 100

### INDUSTRY CLASSIFICATION

The site perfectly matches the Ecommerce & Online Retail category, specifically within the adult boutique niche. The content across all four pages is consistently focused on product inventory, shipping logistics, and customer loyalty programs.

*"The score of 82 is driven primarily by the high information density of the product catalog and the total absence of semantic drift. The few points lost are due to the use of standard industry clichés like World Class and the lack of named expert bios to support authority claims."*
