Industry: Events, Venues & Ticketing

EVENTS, VENUES & TICKETING

66.1 Avg Reputation

Based on 195 businesses audited.

REPUTATION LEVEL

HIGHER REPUTATION THAN AVERAGE

???? (Maoyan Entertainment) has 27.9 points more reputation than the average for Events, Venues & Ticketing.

EXPERT VERDICT

Maoyan is a pure utility engine with almost no marketing bullshit. It provides raw, real-time data as its primary product, making the distance between its claims and its substance negligible. It is a benchmark for high-information-density platform design in the ticketing industry.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

29

97% Reputation

Information density is exceptionally high, with almost zero fluff detected in the core content. Headings such as H2 ???? (Today's Box Office) and H2 ???? (Most Anticipated) lead directly into specific datasets containing raw numbers like '69,795 want to see' for Toy Story 5. The body text is dominated by verifiable nouns, dates, and currency figures rather than qualitative marketing adjectives. Only the meta description contains mild power words like 'favorite platform,' but this is immediately anchored by the sheer volume of 97 currently showing and 122 upcoming films.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

20

100% Reputation

There is no detectable semantic drift between the homepage signal and the sub-page substance. The homepage H1 'Maoyan Movie' promises ticketing and film info, which the /cinemas/ and /films/ pages deliver with granular detail. The cinema sub-page provides exact addresses, specific technology hall types like 'CGS' and 'Dolby Cinema,' and real-time pricing. The film list sub-page aligns perfectly with the temporal anchor of May 31, 2026, listing 'Memory Fragment' and 'Housekeeping Service' as releasing 'Today.'

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

18

90% Reputation

DIAGNOSIS: TRUST THEATRE

The site avoids traditional trust theatre flags like unlinked award badges or fake partner logos. While it displays user ratings such as '9.7' and '9.5' without direct outbound proof links to individual reviews in this crawl, these function as internal platform data points rather than external verification claims. The metadata shows a proof_links_count of 0, which is standard for a primary data aggregator but prevents a perfect score. The trust_theatre_flag remains false as the site relies on its own massive dataset for authority.

EVIDENCE: PROOF DENSITY

The proof density is nearly 1:1, with almost every film or cinema listing accompanied by a specific data point. The site provides 10+ specific numbers per screen-fold, including release dates, want-to-see counts, and price starting points (e.g., \$36.9). Vague assertions are non-existent; even the entertainment news section is tied to specific movie release events and theater schedules.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

14

93% Reputation

The site uses a highly functional utility layout that avoids industry cliches like 'making memories' or 'unforgettable experiences.' It employs specific technical jargon such as 'PRIME,' 'ALPD Pro,' and '120Hz/4K,' which serves as substance rather than fluff. The value proposition is differentiated by its scale and real-time box office tracking, which is a unique competitive feature. The only template fingerprint is the standard cinema filtering system, which is a necessary industry convention for ticketing platforms.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

13

87% Reputation

DIAGNOSIS: AUTHORITY GAPS

Authority is established through raw data rather than personnel profiles, which is typical for a B2C platform. There is a minor technical authority gap as the schema_json is null and the film detail page failed to render body text beyond 'Loading...' in the provided crawl. No Person schema or sameAs links were detected to verify individual experts, though '?????' (Maoyan Professional Edition) is cited as the source for real-time data, providing a verifiable institutional footprint.

EVIDENCE: PERFORMANCE VS. CLAIMS

There is virtually no disconnect between marketing tone and demonstrated capability. The site claims to provide real-time data and box office rankings, which it demonstrates through live timestamps (08:48:31) and specific revenue numbers for 'To Grandma with Love' and other titles. Unlike most service sites, Maoyan provides the results (data) as the primary content rather than claiming results in a case study. The boldest claims are the 'Top 100' rankings, which are transparently backed by internal rating numbers.

INDUSTRY MATCH & SCORE SUMMARY

Events, Venues & Ticketing Reputation: ???? (Maoyan Entertainment)
(maoyan.com)

Reputation: 94 / 100

INDUSTRY CLASSIFICATION

The site is a definitive match for the Events, Venues & Ticketing industry. The content is exclusively focused on real-time movie ticketing, cinema database management, and theatrical box office analytics, fulfilling every primary signal for this category.

"The score of 94 is driven primarily by the lack of structured data (schema) and the technical failure of the detail page crawl. These represent minor gaps in technical authority rather than content bullshit. The information density and semantic coherence are nearly perfect."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
