Based on 1232 businesses audited.

REPUTATION LEVEL

HIGHER REPUTATION THAN AVERAGE

Reporte de Deudas Barato (Gamiria E.I.R.L.) has 15.6 points more reputation than the average for Financial Services, Banking & Insurance.

EXPERT VERDICT

This is a high-substance, low-fluff utility site that relies on price transparency and process speed. Its BS score is kept low by its refusal to use high-finance jargon, though it suffers from typical trust theatre in its testimonial section.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

25

83% Reputation

Information density is exceptionally high for a service-led site, with a low fluff-to-substance ratio. The site avoids generic power words like innovative or disruptive, instead favoring specific nouns and numbers such as S/ 10, 3 minutos, and Sentinel Peru. Body text is predominantly functional, explaining the specific contents of the PDF reports (Score crediticio, Semáforo de puntualidad) and the exact steps for acquisition via WhatsApp.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

18

90% Reputation

There is virtually zero semantic drift between the homepage and sub-pages. The H1 Reporte de Deudas Barato en Perú aligns perfectly with sub-page titles like ¿Dónde conseguir un reporte de deudas barato? and the blog content which provides educational context on Infocorp and the SBS. The pricing and delivery method (S/ 10 via WhatsApp) remain consistent across every URL analyzed.

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

9

45% Reputation

DIAGNOSIS: TRUST THEATRE

Trust theatre is the site's primary BS driver. While the schema reports a review_count of 59, there are 0 proof_links_count, meaning these reviews are self-hosted and unverifiable. Testimonials like 'Carlos M. Arequipa' and 'Marita G. Amazonas' follow classic trust theatre patterns by using first names and broad locations without links to third-party platforms or social proof.

EVIDENCE: PROOF DENSITY

Proof density is moderate; the site provides actual screenshots of the report (IMG markers 1-5) and specific regulatory references to the SBS and REDJUM. However, it lacks external outbound links to independent review sites or the actual Sentinel portal to verify their corporate partnership, relying instead on the user's willingness to risk S/ 10.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

11

73% Reputation

The value proposition is uniquely positioned for the local market by justifying the low price through bulk corporate purchases from Sentinel. While the blog structure follows a standard template fingerprint (Our Process, FAQ), the content within those blocks is highly localized. It avoids the industry_jargon of high-net-worth wealth management (e.g., 'bespoke investment strategies') in favor of high-utility commodity language.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

9

60% Reputation

DIAGNOSIS: AUTHORITY GAPS

Authority gaps exist due to the lack of named experts or individual professional backgrounds. While the site identifies Gamiria E.I.R.L. as the backing entity, the schema_json for Organization contains an empty name property, which is a technical credibility gap. There are no Person schema types or sameAs links to LinkedIn profiles for the company's management.

EVIDENCE: PERFORMANCE VS. CLAIMS

The site's primary performance claim is 'Delivery in 3-5 minutes' and '70% cheaper than official rates.' Unlike many financial sites that make vague 'growth' claims, these are easily verifiable binary outcomes (either the PDF arrives or it doesn't). The disconnect is minimal, as the site provides a 'Ver modelo de reporte' section to pre-validate the output quality.

INDUSTRY MATCH & SCORE SUMMARY

Financial Services, Banking & Insurance Reputation: Reporte de Deudas Barato (Gamiria E.I.R.L.) (reportededeudas.org)

Reputation: 72 / 100

INDUSTRY CLASSIFICATION

The site fits the Financial Services category specifically as a credit data intermediary. It correctly utilizes local Peruvian financial terminology like SBS, Sentinel, Infocorp, and specific payment methods like Yape and Plin, though it operates on the retail fringe of the industry rather than as a primary institution.

"The score of 72 reflects a site with high functional substance. The points were predominantly lost in Trust and Proof due to unverified reviews and in Identity and Authority due to thin technical implementation of structured data. It ranks as 'Low BS' because its marketing claims are nearly identical to its technical deliverables."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
