

AI Reputation Analysis and Signal Evaluation - Sevilla Fútbol Club

BRAND AI REPUTATION

Fitness, Gyms & Sports Clubs Reputation: Sevilla Fútbol Club (sevillafc.es)

https://sevillafc.es

Industry: Fitness, Gyms & Sports Clubs

REPUTATION LEVEL

FITNESS, GYMS & SPORTS CLUBS

63.7 Avg Reputation

Based on 558 businesses audited.

LOWER REPUTATION THAN AVERAGE

Sevilla Fútbol Club has 29.7 points less reputation than the average for Fitness, Gyms & Sports Clubs.

EXPERT VERDICT

Sevilla FC is a substance-free zone in this crawl, relying entirely on brand equity to bridge a massive gap in digital proof. It provides a loud meta-signal but fails to deliver a single byte of forensic substance to the end user.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

5

17% Reputation

The site displays a total substance vacuum with a char_count of 0 and no crawlable body text. The absence of any H1 headings or substantive content results in a 100% fluff-to-substance ratio for the primary signal. There are zero instances of specific numbers, named frameworks, or technical protocols within the provided clean_text.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

5

25% Reputation

A severe disconnect exists between the meta-signal, which promises a comprehensive portal for news and tickets, and the actual content delivered, which is non-existent. The absence of sub-page data makes it impossible to verify the homepage's primary value proposition, resulting in maximum drift. The lack of a heading hierarchy further obscures any logical messaging structure.

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

14

70% Reputation

DIAGNOSIS: TRUST THEATRE

While the review_count and proof_links_count are both 0, the site fails to provide any external proof paths to validate its status or claims. The meta-description makes bold performance claims regarding 'all information' and 'services' without a single linked source or specific evidence point. There is no trust theatre present simply because there is no content to host it.

EVIDENCE: PROOF DENSITY

The ratio of verifiable evidence to unsubstantiated claims is 0:1, as the meta-claims are not supported by a single piece of specific data in the body text. There are no outbound proof paths to case studies, third-party reviews, or certifications across the provided evidence. The lack of sub-page substance results in a total failure of the proof path metric.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

10

67% Reputation

The value proposition in the meta-tags is a generic commodity template for any professional sports entity, offering no unique positioning beyond the brand name. Replacing the brand name with a competitor would result in a perfectly functional, albeit empty, marketing signal. No matches were found for industry-specific jargon because the site provided zero crawlable text.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

0

0% Reputation

DIAGNOSIS: AUTHORITY GAPS

The site lacks any schema_json or structured data to support its claim as an official club authority. There is a significant technical credibility gap due to the total absence of heading hierarchy and structured identity markers like Organization or SportsTeam schema. No named experts or founders are connected to a digital footprint via structured data.

EVIDENCE: PERFORMANCE VS. CLAIMS

The meta-description claims to offer membership services and club information, yet the demonstration of these services is non-existent in the forensic data. This creates a total disconnect between the marketing intent and what the site actually proves to the user. The site operates as a digital ghost, providing a signal but zero substance.

INDUSTRY MATCH & SCORE SUMMARY

Fitness, Gyms & Sports Clubs Reputation: Sevilla Fútbol Club (sevillafc.es)

Reputation: 34 / 100

INDUSTRY CLASSIFICATION

The website identifies as a Sports Club via its meta-data, aligning with the broader industry category. However, the provided data lacks any content related to functional training, HIIT, or the other gym-specific

parameters found in the industry dictionary.

"The score is primarily driven by Information Density and Identity gaps, where the site failed to provide any crawlable substance. The absence of technical infrastructure like schema and headings further inflated the BS score, despite the brand's inherent real-world authority."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
