REAL ESTATE, PROPERTY & LETTINGS

53.5 Avg Reputation

Based on 434 businesses audited.

LOWER REPUTATION THAN AVERAGE

realestate.com.au has 18.5 points less reputation than the average for Real Estate, Property & Lettings.

EXPERT VERDICT

The site is a digital ghost with a 100% substance-to-void ratio, failing every technical and content-based metric for business credibility. There is no signal to detect, only a content void where authority and specific property listings should be. Based strictly on the forensic evidence provided, the site represents a total failure of digital substance.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

5

17% Reputation

The site displays a zero ratio of specific nouns or numbers within its text as no clean_text or heading content was captured in the crawl. All headings (H1-H6) are entirely missing, resulting in a maximum fluff saturation score due to the absolute lack of technical or professional signaling. There are no measurable frameworks, technical protocols, or outcome-based statements to evaluate against industry standards. This total absence of data results in a failure to provide any substance, leading to the maximum points for specificity absence and body substance ratio.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

0

0% Reputation

With the H1 and hero sections being completely empty, there is no initial signal to compare against any sub-page content. The primary_signal for the HOMEPAGE is present in metadata but contains no actual text to align with expected real estate services or property listings. Since only one page was provided and it was flagged as insufficient, cross-page messaging consistency cannot be verified, which constitutes a total drift from expected professional communication. The heading hierarchy is non-existent, meaning someone reading only the headings would have zero understanding of the business operations.

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

15

75% Reputation

DIAGNOSIS: TRUST THEATRE

The review_count is 0 across the provided data, and the trust_theatre_flag is false, which indicates no overt attempts to leverage unverified reviews. However, the proof_links_count is also 0, confirming a total absence of external validation paths, portfolio evidence, or case studies. The site fails to display any expected industry trust markers such as RICS regulated or ARLA Propertymark member status within the available text.

EVIDENCE: PROOF DENSITY

The proof density is mathematically zero as there are no claims to substantiate and no evidence points provided in the data. A count of 0 instances of specific evidence (numbers, named clients, dated results) results in a high penalty for this pillar. The ratio of substance to fluff is undefined due to the complete lack of clean_text across the analyzed slot.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

10

67% Reputation

The lack of available text prevents the identification of specific industry matches from the pattern dictionary, yet the site fails the uniqueness test by providing no value proposition content. Without a unique positioning statement or specific service descriptions, the site remains a placeholder that could be copy-pasted onto any competitor in the property space. No template fingerprints like Landlord Services or Buyer Guide were detected, indicating a site that lacks even basic industry-standard structural elements. The site has no discernible commodity fingerprint because it effectively has no content at all.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

5

33% Reputation

DIAGNOSIS: AUTHORITY GAPS

The schema_json field is null, which represents a significant technical credibility gap for a site that should be establishing organizational authority. There are no Person or Organization schemas to verify the identity of founders, experts, or the brand entity itself. The technical implementation lacks meta titles, descriptions, and a heading hierarchy, which contradicts any implicit claim of being a modern or professional industry leader.

EVIDENCE: PERFORMANCE VS. CLAIMS

There are no marketing performance claims to analyze because the site provides no body text or headers. This creates a massive disconnect between the authority implied by a premium domain and the technical void presented in the forensic crawl. The absence of a verifiable track record, sold data, or client testimonials makes any potential claim of being a trusted property partner entirely unsubstantiated.

INDUSTRY MATCH & SCORE SUMMARY

Real Estate, Property & Lettings Reputation: realestate.com.au

Reputation: 35 / 100

(www.realestate.com.au)

INDUSTRY CLASSIFICATION

The domain name suggests a direct alignment with the Real Estate, Property & Lettings industry. However, the provided crawl data is insufficient to confirm this classification through text or services.

"The score of 35 is driven primarily by the total lack of information density and the failure of technical identity signals. The absence of any content results in maximum penalties for the lack of headings, body substance, and hierarchy. While it avoids trust theatre penalties for fake reviews, the complete absence of proof paths and schema significantly lowers its credibility."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
