53 Avg Reputation

Based on 227 businesses audited.

REPUTATION LEVEL

HIGHER REPUTATION THAN AVERAGE

MEDIAPRONET has 27 points more reputation than the average for Marketplaces & Classifieds Platforms.

EXPERT VERDICT

MEDIAPRONET is a rare example of a high-substance directory that sells exactly what it claims: SEO authority and visibility metrics. The BS score is kept low by the site's refusal to use generic 'innovation' fluff, opting instead for hard data and transparent technical deliverables. It is a utility-first platform with almost no marketing heat-haze.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

24

80% Reputation

The information density is exceptionally high, with a low fluff-to-substance ratio. Headings like [H2] Statistics provide raw numbers (148 Websites, 880 Votes, 55K Views) rather than vague claims of 'massive reach.' The body text avoids generic power words in favor of specific deliverables, such as 'Permanent dofollow backlink from a DR 42 domain' and '72h review time.' Even the value propositions are grounded in technical nouns and measurable timeframes.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

20

100% Reputation

There is zero semantic drift observed between the homepage and sub-pages. The [H1] 'Discover what builders just shipped' is immediately validated by the 'Live feed' on the homepage and the granular categories on the /browse/ page. The pricing page provides a detailed feature matrix that perfectly supports the 'Verified vs Unverified' status mentioned in the homepage FAQ, ensuring a consistent user journey from signal to transaction.

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

15

75% Reputation

DIAGNOSIS: TRUST THEATRE

While the trust_theatre_flag is false, the site displays logos for 'Wired' and 'EarlyHunt' under [H3] 'Trusted by good company' without outbound proof links, which is a mild form of unverified authority signaling. However, the high review_count (174 on the directory) is substantiated by actual user reviews on individual listing pages like /listing/codetrendy/, complete with timestamps and user names. The site claims a 'DR 42' rating, which is a specific, verifiable metric in the SEO industry.

EVIDENCE: PROOF DENSITY

Proof density is high across all 6 pages. The site consistently provides specific counts (votes, clicks, views) for every listing, demonstrating a live, database-driven environment rather than a static marketing site. The /trending/ page serves as a real-time proof engine, showing user activity metrics ('224 views today') that substantiate the platform's claim of providing 'visibility.'

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

9

60% Reputation

The site exhibits some commodity patterns typical of the startup directory niche, matching jargon like 'verified listings' and cliches like 'get discovered.' The template structure for [H2] 'Things people actually ask' is standard, but the content within is non-generic, addressing specific business rules like 'our badge required on your homepage.' The value proposition is differentiated by its transparent 'Verified Business' mechanic rather than just 'connecting buyers and sellers.'

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

12

80% Reputation

DIAGNOSIS: AUTHORITY GAPS

An authority gap exists due to the anonymity of the platform operators; no specific founders or curators are named or linked via Person schema. While the Organization schema for MEDIAPRONET is well-implemented with social media sameAs links, the 'human-reviewed' claim lacks a named face to provide ultimate accountability. Technically, the site is highly authoritative with clean schema, valid JSON-LD, and consistent heading hierarchies.

EVIDENCE: PERFORMANCE VS. CLAIMS

The platform makes bold performance claims, such as 'paid listings average 4.1x the views,' but carefully labels these as 'historical averages, not a promise.' The claim of providing a 'trusted link' is backed by the specific 'DR 42' and 'dofollow' technical specifications. Most claims are framed as platform features (e.g., 'Pinned 7 days') rather than unsubstantiated market dominance assertions.

INDUSTRY MATCH & SCORE SUMMARY

Marketplaces & Classifieds Platforms Reputation: MEDIAPRONET (mediapronet.com)

Reputation: 80 / 100

INDUSTRY CLASSIFICATION

The site aligns perfectly with the Marketplaces & Classifieds category, specifically operating as a curated two-sided marketplace for software products and startup visibility. It facilitates discovery and link-building transactions between 'builders' (sellers of software) and 'makers' (buyers/users), fulfilling the industry role of an aggregator.

"The score of 80 is driven primarily by the anonymity of the team (Identity gap) and the use of industry logos without direct proof links (Trust Theatre). The site scored perfectly in Semantic Coherence and very high in Information Density, preventing a higher BS rating. It is a functionally honest marketplace."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
