41.2 Avg Reputation

Based on 2382 businesses audited.

REPUTATION LEVEL

LOWER REPUTATION THAN AVERAGE

fce.jp has 6.2 points less reputation than the average for Unclear / Mixed / Unclassifiable Industry.

EXPERT VERDICT

The site is a digital ghost with no signal and no substance, currently existing only as a server error. It provides zero information, zero proof, and zero identity, making it a complete failure in business communication. The BS factor is driven by the extreme distance between the existence of a domain and the total absence of a website.

[See how to improve >](#)

INFO DENSITY

Power-words vs. Substance ratio.

15

50% Reputation

The information density of this site is virtually zero, as the only content recovered is a 404 system error message. There are no headings containing power words, but more importantly, there are zero specific nouns, numbers, or named entities to provide any substance. The body substance ratio is 100% generic system text without a single measurable claim or technical protocol. With only 62 characters of text, the site fails to deliver any information regarding its purpose or services.

SEMANTIC COHERENCE

Homepage promise vs. Sub-page reality.

20

100% Reputation

There is a complete semantic disconnect between the expectation of a functioning corporate domain and the reality of a Not Found error. The H1 Not Found provides no signal that aligns with a business identity, creating a total mismatch between domain presence and content delivery. Because sub-pages are non-existent or inaccessible, there is no cross-page messaging consistency to evaluate beyond the primary failure. The heading hierarchy is incoherent, consisting only of a single error status that fails to tell any logical story about the business.

TRUST & PROOF

Verifiable evidence vs. Trust Theatre.

15

75% Reputation

DIAGNOSIS: TRUST THEATRE

The review_count and proof_links_count are both 0, indicating a total lack of social proof or external verification. No trust theatre flags were triggered because the site doesn't even attempt to display reviews or testimonials. However, the complete absence of any external proof paths or third-party links creates a significant vacuum of trust that cannot be bridged with the current data.

EVIDENCE: PROOF DENSITY

Proof density is absolute zero, as the crawl identifies no specific results, dated evidence, or named entities. The ratio of substantiated facts to generic system text is 0 to 62, as no part of the recovered text serves as evidence. Without any external links or verifiable data points, the site offers no foundation for legitimate business claims.

COMMODITY FINGERPRINT

Detection of industry cliches/templates.

5

33% Reputation

The site's content is the definition of a commodity fingerprint, using a standard server-generated 404 template. This value proposition could be found on any broken URL on the internet and is in no way unique to fce.jp. There are no matches with industry clichés simply because there is no marketing text to analyze. The use of a default system template with zero specific business content indicates a total lack of brand differentiation.

IDENTITY & AUTHORITY

Expert verifiability & Schema depth.

0

0% Reputation

DIAGNOSIS: AUTHORITY GAPS

The site suffers from a total authority gap due to the absence of schema_json and meta descriptions. There are no named experts, founders, or team members, and consequently no Person schema or sameAs links to verify professional backgrounds. The technical implementation is fundamentally flawed, presenting a catastrophic credibility gap for any entity claiming a digital presence.

EVIDENCE: PERFORMANCE VS. CLAIMS

The site makes no explicit marketing claims, but it fails the implicit performance claim of being a functioning business website. By presenting a 404 error, the domain contradicts the basic expectation of accessibility and professional reliability. There are no results, case studies, or client references available to substantiate the entity's existence or expertise.

INDUSTRY MATCH & SCORE SUMMARY

Unclear / Mixed / Unclassifiable Industry Reputation: fce.jp (fce.jp)

Reputation: 35 / 100

INDUSTRY CLASSIFICATION

The crawl resulted in a 404 Not Found error, making it impossible to confirm the industry classification. There is a total absence of content to support the Unclear or Mixed Industry designation provided in the analysis parameters.

"The score of 35 is driven primarily by Information Density, Semantic Coherence, and Identity and Authority failures. While the site does not contain marketing fluff, its status as a 404 page results in maximum penalties for lack of substance and technical credibility. The score reflects a site that has a high distance between its assumed brand signal (a .jp domain) and its proven content (nothing)."

ANALYSIS DISCLOSURE & SOURCE ATTRIBUTION

This analysis is part of a non-adversarial audit conducted by 1 Euro SEO. The results are intended as professional feedback to help improve any website's machine-readability and authority signals. The evaluation is free, and any company can request a fresh audit at any time.

Any company can use the insights for free and improve its voice. When a company has updated its content, it can always submit a new audit request, which will be reflected in a new current score.
